AI IN HEALTHCARE AND THE PATIENT'S PERSPECTIVE

RECOMMENDATIONS BASED ON THE 2022 REPORT'S FINDINGS

MONITOR

Monitor and keep track of the varying patient attitudes towards AI

BUILD

Build AI expertise for patients and frontline health workers

SUPPORT

Support developers to access data in ways that uphold patients' rights

ADVOCATE

Advocate for patient involvement from the early stages in AI development

The report contains findings from research sponsored by EPF and helps understand opportunities and challenges of deploying AI in health from a patient perspective. It was prepared by Lydia Nicholas and Jacqueline del Castillo.

The entire report can be found on EPF's website.
