

Launch of the Euro Hepatitis Care Index

Dear friend,

ELPA is pleased to invite you to the official presentation of the Euro Hepatitis Index.

The Euro Hepatitis Index is a tool to empower patients and physicians to promote comprehensive national plans in the field of Hepatitis B and C across the European Union and in Norway, Croatia and Switzerland.

The picture of Hepatitis B and C care varies considerably across Europe: France and Scotland have a dedicated national plan to address viral hepatitis. Other countries have started this process but there are still inequalities in the level of care and treatment patients receive across Europe. The Euro Hepatitis Index will highlight these discrepancies and shortcomings of viral hepatitis policy in Europe and will help identify cost-effective best practices that will improve the lives of patients.

The launch event will be an opportunity to discuss best practices with leading experts in the field and to hear their responses to the findings of the Index and to formulate a collective response to viral hepatitis across Europe.

Looking forward to welcoming you for what promises to be an interesting debate.

Best wishes,

Tatjana Reic
President of ELPA

Tuesday
6 November
from 14h00-19h00

venue: **Sofitel
Brussels Europe**
